

AI Governance Advisory

Service & Procurement Summary

WHAT NJ4AI DELIVERS

Obligation Register	29 GCC frameworks, 6 countries, mapped at obligation level with evidence requirements
Dual-Signed Assessments	AI-classified + operator-countersigned within 72 hrs, ISO/IEC 17025-style templates
Policy + Reviewer Binding	6 policy types, named reviewer per policy, signed PDF evidence pack, ISO 42001 Annex A mapping
Governance Ledger	Content-hashed evidence, append-only audit trail, external-auditor role from day one
Cited-Corpus Chat	Confidence tiers (High/Medium/Escalate), 30-min human escalation SLA, audit-evidence export
MCP + Licensed Workflow	Write-action approval routing, reviewer binding per action, audit trail per MCP action
Readiness Sprint (2+1 wk)	Complete governance foundation in 2 weeks + Week 3 Evidence Walk (Professional)

WHY NJ4AI IS DIFFERENT

- › Licensed dual-activity entity (MC 14283) — not advisory-coded
- › Named senior operator on every contract — not a support queue
- › ISO/IEC 17025 measurement spine — assessments are measurements, not opinions
- › 29 GCC frameworks at obligation level — not summary coverage
- › Content-hashed governance ledger — immutable audit trail from day one
- › Bilingual AR/EN parity — every artefact, not translated after the fact
- › 30-minute audit-response SLA — contracted and measured monthly

PRICING

Foundation	\$3,000/year
Obligation register, cited-corpus chat, basic MCP, quarterly digest, unlimited users	
Professional	\$15,000/year
Everything in Foundation + dual-signed assessments, policy binding, governance ledger, named operator, 30-min SLA, bilingual AR/EN	
Readiness Sprint	\$5,000 one-time
2-week governance buildout + Week 3 Evidence Walk (bundled free with Professional)	

Price parity commitment: matches market rates for equivalent scope.

RISK REDUCTION FACTORS

Licensed Entity MC 14283 — legal accountability, not platform terms of service	Named Operator Contracted per engagement — accountable by name	Audit-Response SLA 30 minutes — contracted, measured monthly	Evidence Integrity Content-hashed, append-only governance ledger

WHEN TO CHOOSE NJ4AI

- › A regulator, prime contractor, or board will ask who signed your AI governance artefacts
- › Your evidence must survive an audit you did not plan for
- › You operate in the GCC and need obligation-level regulatory mapping across multiple jurisdictions
- › You need a named operator accountable for every output — not a platform with a support ticket queue
- › Bilingual Arabic/English delivery is a requirement, not a feature request
